OPERA
New classic form in harmony with indirect lighting.
Compact fluorescent lamps, unique rebound reflector system, cool/quiet electronic ballast orchestrated within a low profile. The result, superior optical performance and wide light distribution, is especially ideal for low-ceiling applications.
The union of elegance and function, now appearing in the Opera Series. Call for your free ticket.

Preferred Parking

For a parking structure driven by efficiency, economy and aesthetics, Spancrete is your perfect choice.

Spancrete structural precast parking deck components put construction schedules on the fast track. Each unit is produced and cured in our plant under carefully controlled conditions, and can be erected quickly on any site in any weather, with fewer delays.

Precast Spancrete cladding offers striking architectural treatment options, too. Like decorative reveals. False joints. Rich exposed aggregates in a variety of colors. Stone or masonry veneers. Even curvilinear shapes.

With Spancrete, you'll save on financing and maintenance costs. Realize a faster return on your investment. And produce a parking structure that's an asset to you and its environment.

Spancrete. The vehicle of choice for high-performance parking structures.

Welcome to the 1995 edition of the AIA Wisconsin *Construction Industry Handbook*. This special issue contains directories of AIA Wisconsin members and member-owned firms. You'll want to keep it handy for use all year long as a resource for information on architects, firms, products and services.

Wisconsin Architect depends on its advertisers.

Did you know that *Wisconsin Architect* is the *only* AIA component magazine which receives no subsidy from member dues? This means that every penny of your dues goes toward providing quality programs and membership services.

It also means that *Wisconsin Architect* depends on its advertisers to continue publishing. So, the next time you specify a product or require a service, refer to the companies that choose to support the profession by advertising in *Wisconsin Architect*. And thank them for their support.

On behalf of the Editorial Advisory Board and staff of *Wisconsin Architect*, I'd like to wish you a happy and prosperous 1995. Keep those projects and feature articles coming!

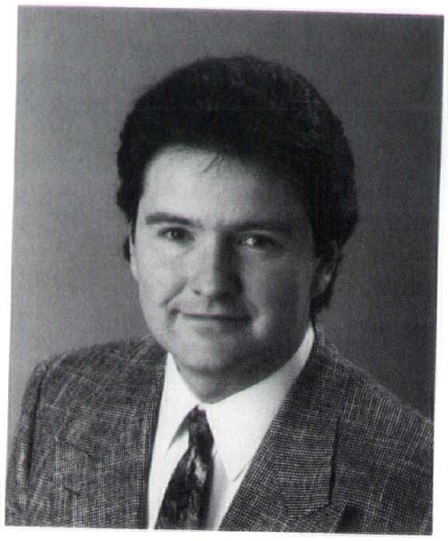
Designing, Building and Rebuilding for Tomorrow

President's Message



Architecture affects everyone's life. It can improve our performance, enhance our physical condition, strengthen our social interactions and lift our spirits. As architects, we inherently understand this; and it's the reason we love what we do.

But forces in the marketplace are changing our profession. Choice, technology, speed of service, discounting, quality, convenience and others are changing the way the market gets its environment built. In response to these forces, diverse client types, delivery methods and types of practices have evolved.

This evolution is changing our profession into one rich in diversity and positioned well throughout all parts of the building industry. We are corporate architects, government architects, design-builders, client representatives, employees of large firms, owners of small practices and others. And, we are called upon more and more to be team members on various owner, designer and construction teams. It is by this diversity and positioning that we are afforded the opportunity to better understand the other team members' objectives so to be better understood ourselves. This will ultimately lead to better architecture for all.

As you ride the waves of change, hold strong and fast to the values you hold as an architect. Listen and understand, then create with integrity and courage. Lead your customers to a higher plane. And, continue to push architecture to new horizons for the benefit of all society.

It is also because of this diversity and positioning that AIA Wisconsin is more important than ever in keeping you connected to your architectural roots and maintaining the common thread that runs through all of us. Review for a moment the "objects" of The American Institute of Architects:

- To organize and unite in fellowship.
- To promote the value of the profession.
- To advance the science, art (and business) of the profession.
- To coordinate the construction industry and profession for the advancement of living standards.
- To make the profession of ever increasing service to society.

I think you will agree, our architectural forefathers were probably thinking of today when they wrote these words.

AIA Wisconsin begins its eighty-fourth year with a clear focus on the future. And, we move forward with a set of goals for the year that proactively respond to the market forces and to your needs in this always-changing profession. We welcome your questions, comments and your support in the accomplishment of the following:

1. To improve communications between you and your organization so that you may see more value in membership and opportunities for involvement.
2. To maintain AIA Wisconsin's excellent practice programs and bring the AIA Continuing Education System into full operation.
3. To elevate our clients' perceptions of our value as architects to strengthen the demand for high quality services.
4. To continue to build our influence in state government to be further recognized as a profession concerned with the advancement of society.

The ongoing realization of these goals will continue the positive growth our organization and profession have experienced. But, more importantly, it will help to position and prepare you to practice better in the profession you love and be of greatest service to society.

Kevin J. Connolly, AIA
President
AIA Wisconsin

When we build let us think that we build for ever. Let it not be for present delight, nor for present use alone; let it be such work as our descendants will thank us for, and let us think, as we lay stone on stone, that a time is to come when those stones will be held sacred because our hands have touched them, and that men will say as they look upon the labor and wrought substance of them, "See! This our fathers did for us."

—John Ruskin

AIA Wisconsin Commissions & Committees

The AIA Wisconsin Board of Directors has established numerous committees of volunteer members to assist in the development of a broad range of programs and services for the benefit of the entire membership and profession. The wide array of AIA Wisconsin committees reflects the varied interests and concerns of the membership.

Your involvement and participation on AIA Wisconsin committees is strongly encouraged. You will benefit from the opportunity to network with other architects from across the state with similar interests. AIA Wisconsin and your fellow members will benefit from the knowledge, skills and expertise you can provide these committees as they shape AIA Wisconsin programs and services.

There also are ample opportunities to get involved with local Chapter committees, task forces and special events. Your participation at the Chapter level can make a big difference. For more information, please contact local Chapter officers in your area.

At the state level, each AIA Wisconsin committee is assigned to one of four commissions: Executive, Education & Practice, Government Affairs and Component Affairs. Each of these commissions has a "Director Advisor" who is a member of the AIA Wisconsin Board of Directors and reports on committee activities at regularly scheduled AIA Wisconsin Board meetings.

The following is an outline of the four AIA Wisconsin commissions and their related committees. It contains the mission statement for each committee along with the name and phone number of the committee chairperson. If the work of a particular committee sounds interesting to you, please contact the chairperson for further details on how you can get involved. If you can't find the committee you're looking for, contact one of the director advisors about establishing a new AIA Wisconsin Committee.

Executive Commission

Director Advisor: Lisa Kennedy, AIA, (414) 332-9072

Executive Committee: To exercise general supervision over the affairs of AIA Wisconsin; to assure that all administrative, financial and other matters assigned to officers by the Bylaws and/or delegated to the Executive Committee by the Board of Directors are carried out in an efficient and effective manner; to safeguard and maintain office and other property; to regularly evaluate the job performance of the executive director and other staff; and to serve as the Board of Directors of *Wisconsin Architect* magazine. *Chairperson*: Kevin Connolly, AIA, (414) 289-0900

Editorial Advisory Board: To provide regular advice and counsel to magazine staff and to develop recommendations for the Board of Directors to assist *Wisconsin Architect* magazine in achieving its established purposes of featuring the work of member architects in a creative format, providing practical informative articles of educational interest,

keeping members informed of current activities and programs, and presenting a forum for material suppliers to advertise their products and services. *Chairperson*: Peter Schuyler, AIA, (414) 351-6390

Mini-Grassroots: To plan, develop agenda for and conduct an annual orientation session on AIA Wisconsin affairs, policies and procedures for the incoming Board of Directors and Chapter officers. *Chairperson*: Horst Lobe, AIA, (608) 263-3012

QBS Committee: To create, maintain and improve a resource readily available to public owners and members for the objective, informed, responsive and professionally responsible promotion of Qualification Based Selection (QBS) procedures; to monitor QBS program and advise the Board of Directors as to its operations; to establish objectives, recommend policies, approve presentation materials, promote owner and member participation, coordinate with related professional organizations and evaluate program performance. (est. 1986) *Chairperson*: Harry Schroeder, AIA, (608) 782-3993

Convention Committee: To work with Board of Directors, staff and other committees to plan, promote, coordinate and conduct an annual statewide conference on design, practice and technology issues that is attractive to members, allied professionals and material suppliers and that achieves or exceeds financial goals established by budget. *Chairperson*: Carl Scott, AIA, (414) 749-9079

Design Awards Committee: To convene an annual design awards jury for selection of the work of member architects that merits recognition for design excellence; to assist in disseminating the results of this selection to members and public through *Wisconsin Architect* magazine, the annual Convention and media thereby fostering public awareness of the work of member architects; to sponsor Honor Awards speaker and banquet; and to encourage dialogue by the public and among members of the purpose and direction of architectural design in Wisconsin. *Chairpersons*: Bob Cooper, AIA, (414) 271-5350; Katherine Schnuck, AIA, (414) 961-3427

Education and Practice Commission

Director Advisor: Bob Shipley, AIA, (608) 238-7626

Continuing Education Committee: To research and make recommendations to Board of Directors and Chapters regarding continuing education programs and policies to meet members' needs and expectations. (est. 1993) *Chairperson*: E. Mitchell Spencer, AIA, (715) 232-1176

Technology & Electronic Media Committee: To identify and evaluate present and future technologies and electronic media and how they relate to architecture; to educate the profession through reports, articles and seminars as to what technologies are available, the pros and cons of each and what the future holds; to proactively interact with and influence the suppliers and creators of these technologies and electronic media to address the concerns of the profession; and to serve as a conduit for sharing information between the profession and the creators of these technologies. (est. 1995) *Chairperson*: Larry Barton, AIA, (608) 276-9200

Wisconsin Architects Foundation: To promote the science and art of planning by advancing the standards of architectural education, training and practice; to provide scholarships to Wisconsin students pursuing degrees in architecture; to provide program grants to student chapters at universities and technical colleges in Wisconsin; and to support programs and activities that increase the public's awareness and appreciation of architecture and architects. (est. 1954) *Chairperson*: Jim Gabriel, AIA, (414) 458-5409

Intern Development Program: To continue to educate interns and practitioners about the Intern Development Program (IDP) and its requirement to become a registered architect in Wisconsin. *Chairpersons*: George Owen, AIA, (414) 771-6222; Arlan Kay, AIA, (608) 251-7515

Fall Workshop Committee: To work with Board of Directors and staff to plan, promote and conduct an annual one-day workshop on practice issues of interest to members. *Chairperson*:

Historic Resources Committee: To encourage the preservation of Wisconsin historic resources; to promote within the architecture profession and the general public a greater awareness, appreciation and respect for those historic resources; to provide leadership, programs and technical support within the profession on preservation-related issues, serving as a source of information and education. *Chairperson*: Bob Corbett, AIA, (608) 283-6300

Dean's Advisory Group: To establish a more formal link and format for increased dialogue between the UWM School of Architecture & Urban Planning and the profession by providing for discussion with the

Dean on School-related issues and programs in conjunction with regularly scheduled meetings of the AIA Wisconsin Board of Directors. (est. 1991) *Chairperson*: Bob Greenstreet, Dean, (414) 229-4016

Minority Resources Committee: To establish liaison with national AIA committee and to provide networking opportunities for minority architects and interns in Wisconsin. (est. 1992) *Chairperson*: Walter Wilson, AIA, (414) 771-6222

Women in Architecture: To establish liaison with national AIA and regional WIA committees and to develop programs of interest to women architects and allied professionals. (est. 1991) *Chairpersons*: Marjorie Brown, AIA, (414) 459-1723; Renee Kubesh, AIA, (414) 332-3369

AIA Documents Committee: To assist the AIA Documents Committee by encouraging and compiling recommendations from Wisconsin members on possible revisions to AIA documents. (est. 1992) *Chairperson*: Brian Larson, AIA, (715) 834-3161

Government Affairs Commission

Director Advisor: John Horky, AIA, (414) 272-2000

Legislative Committee: To identify public policy issues of importance to Wisconsin's design and construction industry; to develop positions and make recommendations on legislative issues of interest and concern to the architectural profession; to lobby appropriate legislative committees and administrative agencies; to encourage the active grassroots participation of members in the legislative process; and to communicate with other professions that have similar legislative concerns. (est. 1970) *Chairperson*: Fred Zimmermann, AIA, (608) 238-7626

DFD Liaison Committee: To establish a continuing dialogue with the state Division of Facilities Development and to establish a format for discussion and resolution of problems and issues of mutual concern. *Chairperson*: Jerry Dommer, AIA, (608) 2241-3340

DILHR Liaison Committee: To establish a format for ongoing discussion and resolution of Building Code, plan review and related issues of concern to the profession and the Safety & Buildings Division of DILHR. (est. 1992) *Chairperson*: Warren Bauer, AIA, (608) 274-2741

Component Affairs Commission

Director Advisor: Erik Hansen, AIA, (414) 739-4932

Membership Committee: To develop and implement programs and materials for expanding membership and for increasing membership retention and participation; to profile and analyze membership attitudes and needs for use in planning member recruitment programs, developing methods to encourage increased member participation and recommending new programs and services to respond to member needs. *Chairperson*: Mike Vander Werff, AIA, (414) 730-0055

Public Awareness Committee: To encourage architects to work together to develop and maintain a clear understanding of the present and future roles architects play in society so to effectively position the profession to be of greatest service; to develop materials and programs to expand the public's awareness of architecture and architects as well as architect's awareness of the public's needs and expectations. (est. 1991) *Chairperson*: Kevin Connolly, AIA, (414) 289-0900

Celebrate Architecture: To promote programs that increase architectural awareness for the purpose of greater appreciation, understanding and enjoyment by society; to assist in coordinating the planning and development of annual Celebrate Architecture activities in each of the Chapters. (est. 1992) *Chairperson*: John Sutton, AIA (608) 255-1245

AIA/AGC Liaison Committee: To improve working relations between AIA Wisconsin and AGC and to enhance understanding of contract documents; to develop recommended practices for use by architects and contractors. (est. 1955) *Chairperson*: Clarence Huettenrauch, (414) 351-6390

Fellowship Committee: To identify and recommend to the Board of Directors candidates for nomination for advancement to the AIA College of Fellows; to encourage members to seek advancement and assist candidates in the preparation of nomination materials. *Chairpersons*: Ron Bowen, FAIA, (608) 238-7626; Wayne Spangler, FAIA, (715) 234-9056

Golden Award Committee: To screen and rank Golden Award nominations for submission of recommendation to Board of Directors. (est. 1990) *Chairperson*: Frank Dropsho, AIA, (608) 221-6263

AIA Regional Directors: To represent North Central Region on the national AIA Board of Directors and to communicate with the leadership of components in the region. *Directors*: Duane Kell, FAIA, (612) 645-6806; James O'Brien, AIA, (612) 338-8981

Concrete. It's changed.

Advanced concrete technology and construction techniques make poured in place reinforced and post-tensioned concrete the structural and aesthetic choice for today's building challenges.

Consolidated Papers Incorporated Wisconsin Rapids, WI

1000 North Water Street Building Milwaukee, WI (upper right)

St. Francis Hospital Parking Structure Milwaukee, WI

American Family Insurance National Headquarters, Madison, WI (lower right)

Monolithic in nature, cast-in-place concrete successfully adapts to almost any shape, including cantilevers, curved or angled elements. Light-weight and high-strength concrete allow both engineer and architect greater design options. And today's cast-in-place concrete can be placed faster with less manpower.

Ready mixed concrete enhances total frame strength and structural safety. Strengths of 6000 PSI are standard. Strengths up to 15,000 PSI are available.

Cast-in-place reinforced and post-tensioned structural concrete offer superior fire resistance, less maintenance, energy efficiency low life cycle costs.

To learn more about structural concrete and our quality control programs call or write:

School of Architecture and Urban Planning

This year marks the 25th anniversary of the School of Architecture and Urban Planning, a program which has grown with remarkable speed and which is now housed in a great new building on the University of Wisconsin-Milwaukee campus. After an enervating first year of finding our feet, we now have the luxury of exploring the opportunities provided by the new facility.

Certainly, the new studios are spacious and well appointed and a great improvement over the older Engelmann Hall spaces, while the new atelier up on the fourth floor provides our 150 sophomores with an excellent introduction to the design part of their education. Before the move, the sophomore studios were taught on a "hot desk" basis, and the addition of permanent space for these students has greatly improved their academic experience and performance. In addition to the studios, which range from the 150-person studio to 3–4 person rooms for thesis students, the School is equipped with great resources including a woodworking ship, a graphics center (with full photography facilities) and four computer laboratories which feature Macintosh and AutoCAD, and a continuing education room dedicated for outreach classes to the professions. The additional spaces—the Commons (or two-story atrium), the exhibition gallery and bookstore—all add to the richness of the programs, many of which are open to architects around the state.

For example, the lecture series attracts speakers from across the country (and occasionally the world) as well as audiences from as far away as La Crosse and Minneapolis. The new exhibition gallery has a full schedule of exhibits by well-known architects which we are equally eager to share with the profession.

Perhaps most importantly, the coming requirement for continuing education provides the School with a great opportunity to serve the profession, and we have developed a full range of courses which are available each semester. If you're interested in seeing our brochure, give me a call.

It's been another good year at SARUP. The students won all the Chicago Awards again this year, closing out the schools in Illinois, Indiana and Michigan for a second year in a row. The students' reputation for excellence and hard work means that they find employment quickly, and this summer, the graduating M. Arch students were effortlessly integrated into practices in Wisconsin and beyond. While 75% of our graduate reside in Wisconsin and Northern Illinois, we now have alumni in 48 states and over 35 countries.

After the successful completion of our fist campaign, we have increased our scholarship base, a much-needed incentive and reward for our students, and established new initiatives in Historic Preservation, Aging and the Environment, Environmental Quality, the Inner City Studio, Frank Lloyd Wright and a Minority Leadership program. We have also, in the past few years, developed an Annual Exhibit of award-winning student work that has toured the state, visiting Eau Claire, Green Bay, Madison, Appleton and several sites in and around Milwaukee, including City Hall and Mitchell International Airport.

The role of the School in the new building is obviously to maintain the quality of our program. As the only accredited School in the state, we play an important part in education future generations of architects and helping shape the states, cities and towns in the 21st century. An important component of this success is our relationship with members of the architectural profession, who provide the ultimate home for many of our students. I believe that the relationship of the School with the profession is currently a strong one. We have good communication with AIA Wisconsin and the membership and, through vehicles such as the Mentoring Program, adjunct teaching/jurying and the guest programs we make available, create a productive and mutually beneficial relationship. However, there's always room for improvement, and I am never happier than when our colleagues are swarming around the building or calling me up with helpful suggestions (I said helpful). So, please drop by, come to a lecture, sign up for a continuing education course of give me a call if you have ideas.

EDITOR: Robert C. Greenstreet, Assoc. AIA, is the Dean of the UWM School of Architecture and Urban Planning. You can contact him in writing c/o UWM SARUP, P.O. Box 413, Milwaukee, WI 53201, or by phone at (414) 229-4016.

AIA Wisconsin Membership Directory

AIA Wisconsin is the statewide component of The American Institute of Architects. With over 1,200 members, AIA Wisconsin represents Wisconsin architects and allied professionals in private practice, corporations, industry, government and education.

AIA Wisconsin is composed of four local Chapters: Southeast, Southwest, Northeast and Northwest. Each AIA Wisconsin member also is a member of one of these local Chapters.

The objectives of AIA Wisconsin and its members are:

- To advance the science and art of planning and building by advancing the standards of architectural education, training and practice.
- To coordinate the building industry and the profession of architecture.
- To promote the aesthetic, scientific and practical efficiency of the profession.
- To insure the advancement of the living standards of people through their improved environment.
- To make the profession of architecture of ever-increasing service to society.
- To cooperate with and promote the objectives of The American Institute of Architects within the state of Wisconsin.

The accompanying *1995 AIA Wisconsin Membership Directory* is divided into four sections corresponding to AIA Wisconsin membership categories:

AIA Members: Registered architects who are Architect members of The American Institute of Architects (AIA). Within this membership category, Emeritus members are designated by AIA-E and Fellows of The American Institute of Architects by FAIA.

Associate Members: Associate AIA members include individuals without architectural registration from a U.S. licensing authority who either are eligible by education and experience and actively working towards licensure as an architect, employed under the supervision of an architect, have a professional degree in architecture, are university faculty involved in architectural research or teaching, or have an architectural license from outside the U.S.

Professional Affiliate Members: Individuals who are not architects but may be registered to practice their professions where such requirements exist. The category includes professional engineers, landscape architects, interior designers and other professionals whose work is related to architecture.

Student Affiliate Members: Undergraduate and graduate students attending architectural schools and vocational-technical colleges in Wisconsin.

The *AIA Wisconsin Membership Directory* includes the following information for each member: name, firm name, mailing address, daytime telephone number and local Chapter. The *Directory* is updated annually as part of a survey of all members conducted each fall.

If you have any questions, comments or suggestions regarding this *Membership Directory*, please contact: AIA Wisconsin, 321 S. Hamilton Street, Madison, Wisconsin 53703; (608) 257-8477/1-800-ARCHITECT.

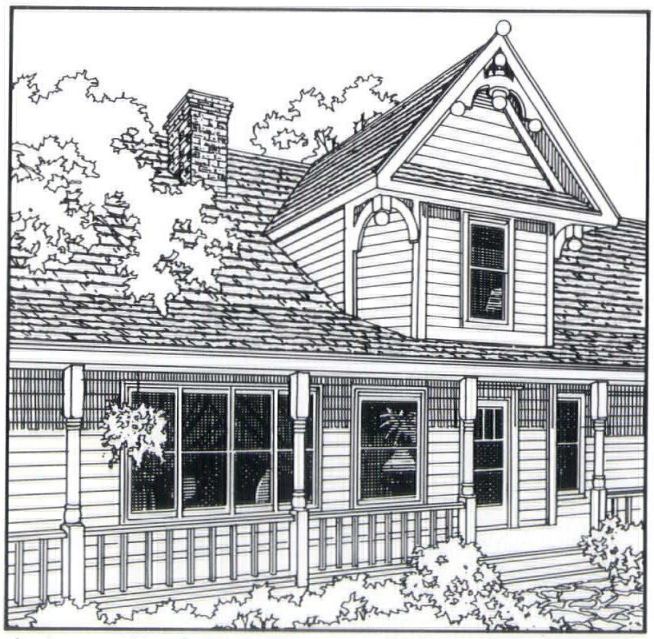
ALL OVER AMERICA ONE NAME MEANS WINDOW QUALITY.



It's Andersen, the windowmaker whose beautiful craftsmanship and quest for quality have produced the nation's best-known brand of windows. Whether you're building or remodeling a home, or replacing windows, come see us. We'll point out all the quality features of Andersen® products. And show you how beautifully America's best-known windows and patio doors can fit into your plans.

Come home to quality. Andersen.

Andersen AW Windows · Patio Doors ®

When it comes to great fabrication our reputation

is stainless.

Our reputation is stainless by design. We're the Sheet Metal Contractors of Milwaukee, whose shining products are seen all over the city, from fancy duct work to monumental architecture. Sheet Metal is better by design!

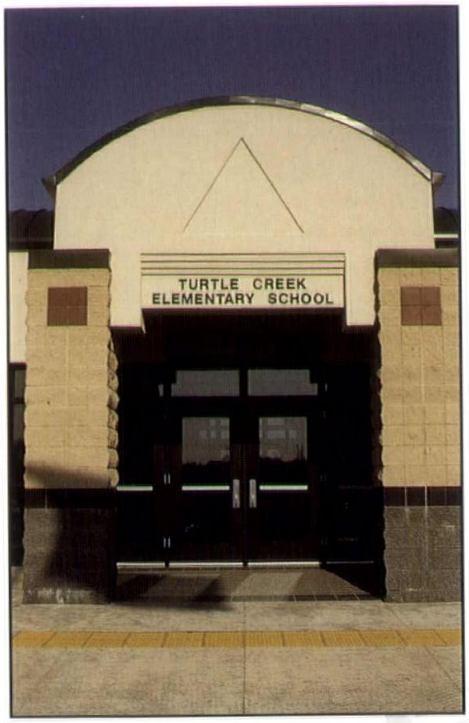
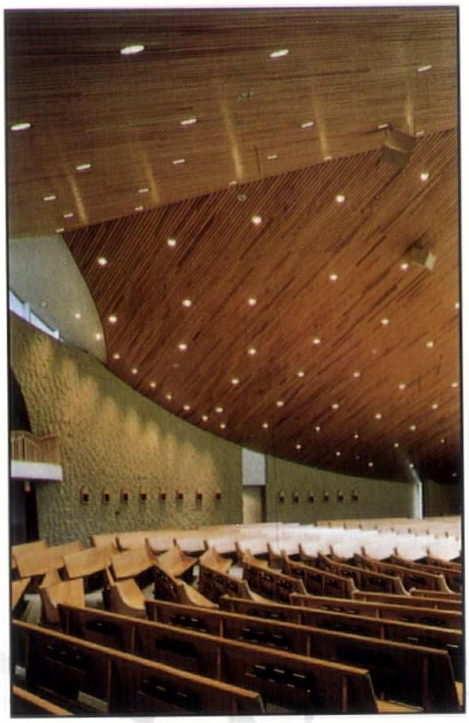
Award Finalists

The versatility of concrete masonry!

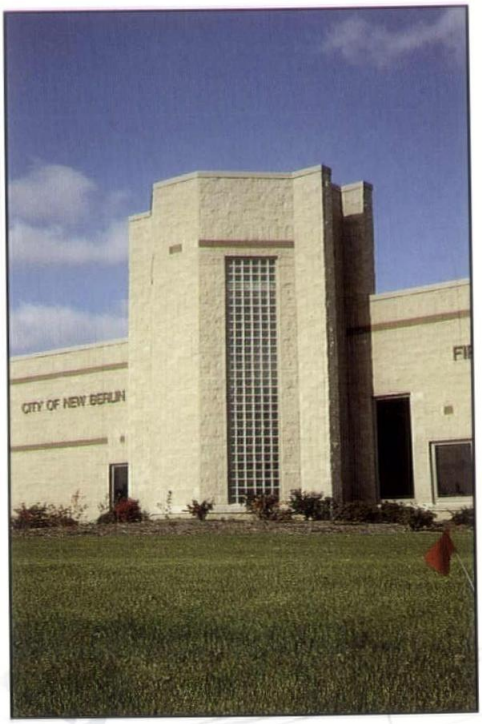
Beauty • Strength • Economy



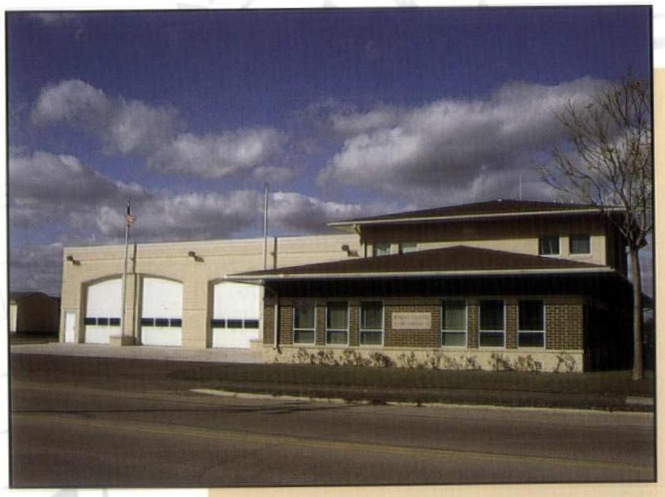
Turtle Creek Elementary School
Delavan, WI



Church of Saint Patrick
Wadsworth, IL



New Berlin Fire Station
New Berlin, WI



Muskego Volunteer Fire Company Station #1
Muskego, WI

McDonald's Playland
Greenfield, WI

1994 WCMA Excellence In Masonry Awards

Award Finalists

1994 WCMA Excellence in Masonry Awards

Turtle Creek Elementary School

Location: Delavan, WI

Architect: The Stubenrauch Associates, Inc.

General Contractor: J. H. Hassinger, Inc.

Mason Contractor: J. H. Hassinger, Inc.

CMU Manufacturer: Best Block Company

Cost: $3 million

Size: 67,000 sq. ft.

Masonry Construction: The thoughtful combination and continuity of masonry materials from exterior to interior enhance this educational setting as 8"/2"/4" block and block double wythe construction is utilized.

Church of St. Patrick

Location: Wadsworth, IL

Architect: Belli & Belli Architects

General Contractor: George Allen Construction Co.

Mason Contractor: Nelson/Vidlak, Inc.

CMU Manufacturer: Best Block Company

Cost: $2.5 million

Size: 21,000 sq. ft.

Masonry Construction: This design incorporates 4"/2"/8" block and block double wythe textured CMU's on the interior and exterior. The sanctuary features CMU's chosen to exude warm patterns and emanate aesthetic beauty.

New Berlin Fire Station

Location: New Berlin, WI

Architect: Fischer-Fischer-Theis, Inc.

General Contractor: Siesel Construction

Mason Contractor: Keystone Masonry

CMU Manufacturer: Waukesha Block Co., Inc.

Cost: $3.7 million

Size: 30,000 sq. ft.

Masonry Construction: 8"/4"/4" block and block double wythe construction and subtle colors produce a nicely executed design for this community resource.

Muskego Volunteer Fire Company Station #1

Location: Muskego, WI

Architect: PSI Design, Inc.

General Contractor: A.S.I. General

Mason Contractor: Ed Prager & Son

CMU Manufacturer: Best Block Company

Cost: $775,000

Size: 12,700 sq. ft.

Masonry Construction: 12" insulated, single wythe, load bearing masonry construction combined with the architecturally dramatic roof lines and tower add elegant detailing to this building's design and function.

McDonald's Playland

Location: Greenfield, WI

Architect: Haag Design Associates, Inc.

General Contractor: Bentley & Sons, Inc.

Mason Contractor: Keystone Masonry

CMU Manufacturer: Best Block Company

Size: 1,270 sq. ft.

Masonry Construction: This 8"/4" block and block composite wall incorporates a creative, yet simple design, offering an inviting, open atmosphere for children and patrons alike.

Selecting and Working with an Architect

Whether you are building your own home or planning a commercial facility, selecting the right architect is important to a successful project. The architect is the one professional who has the education, training, experience and vision to guide you through the entire design and construction process, from helping you define what you want to build to helping you get the most for your construction dollar. Working with other design and construction professionals, architects can help you achieve a well-designed project that meets your needs and works within your budget and time frame.

Building projects are complicated and expensive undertakings loaded with critical decisions. Hiring an architect to help you through the process is one of the best investments you can make.

Architects are trained to analyze your functional needs, long-term goals and budget. Using this analysis, the architect designs a building that helps meet your current and future needs. When designing a building, an architect seeks to balance several often conflicting elements, including function, aesthetics, economics and technology. And the architect must balance these elements within the context of building codes and zoning regulations.

Architects work with you to:

- *Help clarify and refine your building needs.* Through a process called programming, the architect examines your requirements, budget and building site and then works with you to define what is to be built and to establish the project's scope. For example, you may think you need a new building. An architect may be able to show you how to meet your objective by renovating or adding on to the space you are currently occupying.

- *Help you look ahead.* Architects are planners who look beyond your immediate requirements to design flexible buildings that will adapt to your changing needs. For example, architects think about how to accommodate changing computer/communications technology.

- *Help manage the building project.* From conception to move-in, the architect is your project leader. As the central clearinghouse for ideas, schedules and every other facet of the project, the architect manages and coordinates the project elements.

- *Help maximize your construction dollar.* A building designed for maximum energy efficiency can cut your heating and fuel bills. The architect's efficient use of space may reduce the square footage you require. A well designed building not only can reduce initial costs but also can increase its value.

- *Take a broad view.* Architects look at the impact the building will have on the people who use it, the surrounding area and the natural environment. The result is the creation of office spaces that make interaction between departments move more smoothly, retail areas that display your products in their best light and prompt customers to buy, and factory and administrative environments that stimulate employee productivity and satisfaction.

Wise Investment

Architects are trained to solve problems in creative ways, translating your needs into square feet and three dimensional space. With their broad knowledge of design and construction, architects can show you alternatives and options you might never think of on your own.

The architect's services are a wise investment because:

- A well-designed project can be built more efficiently and economically. Architects plan your project with you. As your ideas evolve, changes can be made on paper much less expensively than later on when construction is underway. Thorough drawings also make it easier for the contractor to accurately price and build your project.

- Energy efficient building design can save you money on fuel bills. An architect can design a building to maximize heating from the sun and let in natural light, thus reducing your heating, cooling and electric bills over time.

- The architect can work with your budget and help you select the appropriate materials and workmanship at a fair price. Architects develop the drawings and specifications to help you get bids for construction that are based on your requirements.

- An architect can help you choose materials and finishes that are durable as well as beautiful, saving on frequent maintenance and replacement costs. Their familiarity with the full range of materials enables them to suggest the appropriate materials for your project.

- Good design sells. A well-designed house has a higher resale value. A well-designed store draws customers. A well-designed work environment attracts employees and increases productivity.

- The architect can make your life easier. Let's face it, building is a long process that is often disruptive, particularly if you are living or working in the space under construction. The architect you hire looks out for your interests and tries to find ways to make that process go smoothly.

- If your project requires engineering or other design services, the architect can coordinate this team of experts so you don't have to. The architect sorts out complex building codes and zoning laws. The architect can help you find qualified construction contractors based on your requirements. The architect visits the construction site to help verify that the project is being built according to plans and specifications.

Selection

Architecture firms come in a variety of sizes and types. Each firm brings a different combination of skills, expertise, interests and values to its projects. Some firms specialize in one or more project or facility types. Some firms include in-house engineering services (e.g. civil, structural, mechanical or electrical) or other design disciplines (e.g. planning, urban design, landscape architecture or interior design). Many other architects introduce these disciplines through appropriate consultants. The right kind of firm for your project will depend on the specific demands of your project and what you are looking for in an architect.

First-time clients, and even experienced clients facing new situations, often have many questions about architect selection. The following are some of the more common:

- *When should I bring the architect into the picture?* The best time to bring in an architect is as early as possible in the project. Long before plans and specifications are developed, there are many crucial decisions to be made. Architects can help you define the project in terms that provide meaningful guidance for design. Working with a preliminary evaluation of your needs, an architect can help you find a site that presents the best opportunity to construct the kind of building you envision. Other predesign services architects offer include economic feasibility studies, assistance in developing project budgets and schedules, and help in obtaining project financing.

- *Should I look at more than one firm?* Usually, yes. The exception, of course, arises when you already have a good relationship with an architect and it makes little sense to change.

- *How do I find potentially suitable firms to contact?* Start building a list of potential architects. Contact other owners who have developed similar facilities and ask who they interviewed and ultimately selected. Ask who designed buildings and projects that you've admired or that seem especially appropriate. Get recommendations from friends and relatives who have worked with architects. AIA Wisconsin publishes directories of AIA member architects and member-owned firms. AIA Wisconsin also has directories of members interested in residential projects and historic preservation and assists public owners in establishing a complete Qualification Based Selection (QBS) process for their projects.

- *What information should I request?* Contact each firm on your list. Describe your project and ask if they are available to take it on. If they are, request literature outlining the firm's qualifications. If the architect is unable to handle your project, ask if s/he can suggest another firm. The materials you receive from interested firms might include a letter of interest, brochures, fact sheets, photos of past work and biographical material about key personnel. Look beyond the style of the brochure to determine which firms have the right experience and capabilities for your project. At this point, you should be able to narrow your list to the architects you will interview.

- *Why are formal interviews desirable?* An interview addresses one issue that can't be covered in brochures and printed materials: the "chemistry" between you and the architect. It also allows you to investigate how each architect will approach the project. Remember, you will be working with the architect for a long time and will want someone with whom you feel comfortable.

- *How many firms should I interview, and how should they be selected?* Most people advise that you interview between three and five firms, enough to see the range of possibilities but not so many that an already tough decision will be further complicated. Treat each firm fairly, offering, for example, equal time and equal access to your site and existing facilities. Ask to meet the key people who will work on your project.

- *What can I realistically expect to learn from an interview? How can I structure the interview to make it as informative as possible?* During the interview, ask a lot of questions. You can learn how the team the architect has put together will approach your project. Ask how the architect will gather information, establish priorities and make decisions. Ask what the architect sees as the important issues or considerations in the project. Evaluate the firm's interest in your project. Evaluate the firm's style, personality and approach: are they compatible with yours? If, during the interview, there is something you do not understand, ask the architect for clarification.

- *How should I follow up?* Tell each firm what you intend to do next and when you plan to make your decision. If you haven't talked with past clients, do so now. Assess both the performance of the firm and the performance of the resulting architecture. You may want to visit existing buildings to see them in use. Notify the selected firm as soon as possible. Remember, conditions change; the firm may not be able to offer the same project team if you must take several weeks or months to decide.

- *On what should I base my decision?* Personal confidence in the architect is paramount. Then seek an appropriate balance among these factors: technical competence, professional service, cost and design skills. Once you've selected the best firm, enter into detailed negotiations of services and compensation. If you cannot agree on contract terms, begin negotiating with your second choice.

However the architect selection process is approached, it is worth taking the time to do it well. Here's some additional guidance:

- *You are engaging the services of a professional.* You will work closely with the architect through the life of the project, and your relationship may extend to future projects. Invest at least the care it takes to select a financial or legal advisor.

- *Yours will also be a business relationship.* Find out how prospective architects do business, how they work with their clients, how responsive they are to your management and decision styles, and how well their work stacks up against their clients expectations. The best way to find out is to talk with other owners for whom the firm has provided professional services.

- *Ask questions.* Respect the architect as a professional who will bring experience and specialized knowledge to your project. At the same time, don't be afraid to ask the same questions you've asked yourself: What does the architect expect from the project? How much information does the architect need? How does the architect set priorities and make decisions? Who in the firm will work directly with the client? How will engineering or other design services be provided? How does the firm provide quality control during design? What is the firm's construction-cost experience?

- *Be frank.* Tell the architect what you know and what you expect. Ask for an explanation of anything you don't understand. The more on the table at the beginning, the better the chances for a successful project.

- *Get it in writing.* Once you have found the architect, you are ready to put in writing the terms of your agreement regarding the scope of work, services, schedule, construction budget and architect's compensation. This written agreement can take many forms. The American Institute of Architects has developed a variety of standard contract forms which are used industry-wide. The AIA Wisconsin office maintains a complete inventory of these AIA contract documents.

Project Delivery Methods

There are a variety of project delivery methods. The choice depends in large measure on the nature of the project and time and budget constraints. An architect can advise you on the method most appropriate to the needs of your project. The two most common project delivery approaches are separate contracts for design and construction (design/bid/build) and one contract for both design and construction (design/build).

With the traditional design/bid/build method, you hire the architect and contractor, signing separate contracts with each. The architect is usually hired first to prepare construction documents, which include drawings and specifications. When these

documents are completed, they become the basis for soliciting contractor bids and negotiating and awarding a construction contract During construction, the architect serves as your representative, administering the contract and helping check that the contractor's work is in accordance with the drawings and specifications.

This separate contracts system is the most widely used in the United States. The advantages of utilizing this type of approach are that it gives you greater control over and involvement in project decisions, provides a firm cost figure before construction begins, and provides a system of checks and balances which helps to ensure that your interests are looked after by a professional who has no financial stake in the outcome of the construction contract.

A disadvantage of the design/bid/build approach is that it may require more of your time.

Under a design/build arrangement, you hire a single firm to both design and construct the project. The architect does not work for you, but for the design/build firm. You may not deal directly with the architect but with a representative of the design/build firm.

An advantages of the design/build approach is that it provides you with a single point of project responsibility. Potential disadvantages of this project delivery method are that it allows you less control over the design process, gives the design/build firm the authority for decisions affecting its ability to remain within the budget and on time, and eliminates the traditional checks and balances of the design/bid/build approach.

There are, of course, many variations to these project delivery methods, with different advangates adn disadvantages. Your architect can help you select the most appropriate method for your project.

Successful Projects

The best building projects are created when the client and architect work together as a team. Both you and your architect can take specific steps to help meet your quality, time and budget goals.

Design and building are group activities. Many people and firms come together to do a project. They may not have worked together before; and they may not work together again. They collaborate to produce a unique building on a specific site. As the project unfolds, hundreds of individual design decisions and commitments are made. Needs and conditions change; and work is modified. A strong and healthy relationship between owner and architect is essential to keep the project on track.

Design and construction projects typically involve several steps or phases. These may include: programming, schematic design, construction documents, bidding or negotiation with contractors and construction. However, on some projects several of these steps may be combined; on others there may be additional phases involved.

The architect's involvement normally does not stop with the preparation of construction documents. Architects also provide construction administration services. These services may include assisting you in hiring the contractor, making site visits, reviewing and approving the contractor's applications for payment and keeping you informed of the project's progress.

The path to a successful building project is paved with lots of challenges and uncertainty. There are literally hundreds of decisions to be made, decisions which have a strong impact on how the project looks and functions over time.

Designing a building is exciting and creative. Both the architect and building owner bring something to the relationship that the other needs. As the owner, you have a building goal and the financial resources to realize that goal. The architect brings extensive professional training and experience, creativity and project management skills.

Be open to new ideas. Be candid about how you want the end result to feel and look. It is important that you or someone from your company be very involved with the project, asking questions and providing information to the architect.

Experience tells us that successful projects — those that respond to owner needs and aspirations, that are accomplished within schedule and budget and that contribute to the quality of our communities and our lives — result from clients and architects who form solid professional and business relationships. These relationships are formed early on and are nourished by clear expectations and a willingness of both you and your architect to accept your responsibilities for achieving a successful project.

This brief introduction to selecting and working with an architect was adapted from three publications by The American Institute of Architects: A Beginner's Guide to Architectural Services *(N1010),* You and Your Architect *(N802) , and* Building Relationships *(N1011). To order these publications, call 1-800-365-ARCH (2724). For directories of AIA Wisconsin members and further assistance, please contact: AIA Wisconsin, 321 S. Hamilton Street, Madison, Wisconsin 53703; (608) 257-8477 or 1-800-ARCHITECT.*

AIA Wisconsin Firm Directory

Design and building are inherently exciting; and there is nothing more satisfying than a successful project. The secret to success lies in the professional, business and personal relationship between building owner and architect. Whether you are building or remodeling your home or planning a commercial, industrial or public facility, selecting the right architect is important to achieving a successful project.

Members of AIA Wisconsin have been selected for major projects across the country and have received many important awards. AIA Wisconsin member architects have assisted thousands of clients with creative solutions to their building needs.

Investing in the professional services of an architect is a wise use of often very limited building resources. A well-conceived project can be built more efficiently and economically. An architect can design a building to maximize natural light, thus reducing heating, cooling and electric costs. The architect can help you select materials and finishes that are durable as well as beautiful, saving on maintenance and replacement costs. Good design pays dividends...a well-designed store draws customers and a well-designed work environment attracts good employees and increases productivity.

If you need the professional services of a qualified architect, you will find a suitable firm in this *1995 AIA Wisconsin Firm Directory*. The firms listed will welcome the opportunity to discuss your project with you.

The *AIA Wisconsin Firm Directory* includes the following information on each firm: firm name, address, county and telephone and fax numbers; names of the principals or partners of the firm; number of registered architects and total employes; and a description of the firm's practice.

The information contained in the *Directory* was provided by the firms as part of an annual survey of AIA Wisconsin members. It is a roster of firms owned by AIA Wisconsin member architects. To be listed, at least one of the firm's principals or partners must be a registered architect and an AIA Wisconsin member.

You are encouraged to keep the *1995 AIA Wisconsin Firm Directory* handy for reference throughout the year. Contact the firms listed for further information about their practice and the professional services they can provide for your project. If you have any questions or suggestions regarding the *Directory*, please contact: AIA Wisconsin 321 S. Hamilton Street, Madison, Wisconsin 53703; (608) 257-8477/1-800-ARCHITECT.

Helmut Ajango, AIA
William Hiltner, AIA

Registered Architects: 2
Total Employees: 6

Description of Practice:
Building types break down as 25% residential (apartments, homes), 15% restaurants, 30% churches, 20% restoration and interior design and 10% offices. The firm has practiced in Wisconsin for 25 years and has received honors for its designs. The principal architect has a degree in art, architecture and architectural engineering and the firm strives to carefully and imaginatively combine all three. Of all the different building types, the firm enjoys the churches the most, feeling it is this building type that generally strives for more imagination than some others and wishes to be built for the least cost, giving the architect the greatest challenge.

Description of Practice:
Incorporated in 1965, AEI continues to offer professional design services to clients throughout Wisconsin. AEI is a full-service architectural/engineering firm with expertise in facility evaluations, restoration, adaptive reuse studies, remodeling, energy conservation, elevator modernization and new construction. Services include feasibility studies/preliminary design, preparation of construction documents, bid period services, construction review and contract administration. Our mechanical and electrical design skills complement and support our creative design talents. Projects include health care facilities, schools, teaching and research laboratories, office facilities, ADA/access improvements and religious/liturgical architecture. AEI offers creative, pragmatic and cost-effective solutions that satisfy our clients' aesthetic and functional needs.

Ted R. Haag, AIA

Registered Architects: 2
Total Employees: 5

Description of Practice:
Haag Design Associates is a full-service architectural, engineering and construction management firm that provides efficient and personalized services. Successful integration of the architectural and engineering design disciplines along with "hands-on" experience in construction management has had a positive impact on past projects. Past experience includes municipal, educational, commercial, food services, light industrial, medical, religious, hotel, multi-family, historic renovation and adaptive reuse projects. We will continue our efforts in maintaining a positive interaction between the owner/architect/contractor team so as to turn over a mutually successful project. Our success will always be dependent on our clients' satisfaction and the success of their projects.

County: Milwaukee

Robert J. Gregorcich, AIA
David M. Felton

Registered Architects: 2
Total Employees: 6

Description of Practice:
Midwest Design & Development Corporation provides integrated architectural/construction management services for commercial and institutional clients, with special emphasis on outpatient health care facilities. Responding to desires expressed by our clients for continuity and a single source of accountability throughout a project's life, all work is done on a design/build basis. The size of the firm is intentionally kept small, allowing the principals to maintain direct client contact through all phases of a project. The firm is respected for its ability to propose creative solutions for difficult buildings and sites, and to accomplish complex alteration and expansion programs while keeping the client's business fully operational.

FAX (608) 785-2214
County: La Crosse

Valentine J. Schute, Jr. , AIA
Tim P. Larson, AIA

Registered Architects: 4
Total Employees: 10

Description of Practice:
Continuous involvement is the philosophy of our firm. The partners take an active role in each project, from planning and design to construction. Our clients are part of the design team. Instead of guessing what they want, we ask them what they want and what their needs are. Then we solve their problem, not ours. This philosophy has proved successful for projects that range from schools, libraries and churches to corporate headquarters and financial institutions to private homes to extensive restoration/renovation work.

Team members of VGA have received numerous awards from The American Institute of Architects, the Architectural League of New York, *Progressive Architecture*, AIA Wisconsin and AIA Chicago. Projects continue to be published by *Progressive Architecture*, *Architectural Record*, *Architecture and Urbanism* and numerous professional publications in Europe, Japan and the United States. VGA services include programming, feasibility studies, architectural design and interior design with project experience in multi-family housing, libraries, museums, theaters/orchestra halls, corporate offices, research laboratories, urban planning and retail.

VENTURE ARCHITECTS
205 W. Highland
Milwaukee, WI 53203
(414) 271-3359
FAX (414) 271-0939
County: Milwaukee

Gary V. Zimmerman, AIA
David T. Kahler, FAIA

Registered Architects: 61
Total Employees: 156

Description of Practice:
Venture Architects was established in 1983 specifically for the design of criminal justice projects and large-scale athletic facilities. Our project portfolio consists of state prisons, pre-sentence county jails, court facilities, work release facilities as well as a major state master plan for existing and future correctional facilities. Our completed projects have been repeatedly recognized for their design excellence by the AIA Architecture for Justice Awards Program. We have also designed two major sports facilities. We offer services in all phases of design: long range planning, program development and needs analysis, master/site planning, architectural/interior design, security design, code analysis and ADA review.

VETTER DENK ARCHITECTS, INC.
614 North Broadway
Milwaukee, WI 53202
(414) 223-3388
FAX (414) 233-4825
County: Milwaukee

John C. Vetter, AIA
Kelly L. Denk, AIA

Registered Architects: 2
Total Employees: 5

Description of Practice:
In 1985 we founded our firm to fill a perceived void which we noticed in the architectural community. At that time many architects were designing "lifeless" buildings which did not work in harmony with the land. Our mission is to create architecture which compliments and enhances the land; to design and build structures "with life." By developing a team of highly skilled carpenters and craftsmen, we take an integrated design/build approach. The construction process is a major determinant of architectural form. By overseeing and controlling all aspects of a project, we ensure that quality is maintained throughout a project's life.

James A. Vierbicher

Registered Architects: 4
Total Employees: 61

Description of Practice:
Founded in 1976, Vierbicher Associates, Inc., is an architecture, engineering, land surveying/mapping and community development firm, with offices in Reedsburg and Madison. Past projects include a wide variety of building types including municipal buildings, banks, commercial/retail, restaurants, courthouse facilities, offices, multi-family housing, industrial facilities and ADA assessments. In addition to architecture, we offer municipal, environmental and transportation engineering, surveying, mapping, grant writing, planning and inspection services. Recent projects include the Sauk County Courthouse, Baraboo; Reedsburg Bank, Reedsburg; Grede Foundries additions, Reedsburg; DeForest Safety Building, De Forest; and Nekoosa City Hall, Nekoosa.

W

WCH-AIA, ARCHITECT
207 E. Main St.
Mt. Horeb, WI 53572
(608) 437-4936
FAX (608) 437-8036
County: Dane

William C. Herbert, AIA

Registered Architects: 1
Total Employees: 3

Description of Practice:
WCH-AIA, Architect specializes primarily in wood construction as related to high-end single family housing. However, memory lapses from time to time have resulted in the group's involvement in smaller multi-family, condominium, office and light commercial type projects, always utilizing the advantages of wood construction. Registered to practice in five states, the group's principal enjoys the inter-personal experience working with single clients and places the full weight of his 35 years of experience to work for their benefit. Truly quality-conscious clients are the essence of this practice—others are referred elsewhere.

LOUIS WASSERMAN & ASSOCIATES

County: Milwaukee

Louis Wasserman, AIA
M. Caren Connolly

Registered Architects: 2
Total Employees: 4

Description of Practice:
Louis Wasserman & Associates provides full professional services from feasibility studies, research, schematic design, site planning, land use planning, landscape architecture and design development through contract documents and project administration. We are CAD/computer automated with the simulation capacity to "walk" the client through the design. We have experience in the design of commercial, institutional, residential, recreation, historic preservation and renovation projects. Our office has expertise in ADA accessibility analysis for both site and building concerns. Our approach to each project is to develop with the client a dynamic design solution that has functional and cost sensitive appropriateness. Our firm's award-winning work has received national recognition.

MEMBERS SERVING ON BOARDS AND COMMITTEES

FRED A. WEGNER
School Board Architect, City of Milwaukee

FRANCIS J. ROSE
Member, Civil Defense and Disaster Committee

RICHARD W. E. FERRIN
Executive Director, Housing Authority, City of Milwaukee

LEON M. GURDA
Building Inspector, City of Milwaukee

STANLEY A. RYPEL
Member, Land Commission and Mayor's Advisory Council, City of Milwaukee

URBAN F. PEACOCK
Member, Board of Standards and Appeals, City of Milwaukee

WALLACE R. LEE, JR.
Instructor in Architecture, Layton Art School

ALVIN E. GRELLINGER
Member, Building Code Committee, City of Milwaukee

ARTHUR O. REDDEMANN
Member, Committee on Off Street Parking, City of Milwaukee

LEROY A. RIEGEL
Consultant to the Development Committee, Milwaukee County War Memorial

JOHN MESSMER
Superintendent of Buildings, Milwaukee County

HERBERT J. GRASSOLD
RUBENS F. CLAS
Building Board, Village of Shorewood

GEORGE SPINTI
ELMER A. JOHNSON
Architect's Committee, Village of Whitefish Bay

FERDINAND J. BRIMEYER
CHARLES W. BURROUGHS
WILLIAM G. HERBST
RALPH H. KLOPPENBURG
GREGORY G. LEFEBVRE
FRITZ VON GROSSMANN
Building Board, Village of Fox Point

WALTER A. DOMANN
Secretary, Planning Commission, Town of Brookfield

MEMBERS SERVING ON BOARDS AND COMMITTEES (Cont'd.)

EDWARD J. LAW
Chairman, Building Code Committee, State of Wisconsin

PAUL E. NYSTROM
Representative, Heating and Ventilating Code Committee, State of Wisconsin

GERRIT J. DEGELLEKE, Chairman
EDGAR H. BERNERS, Vice Chairman
RALPH H. KLOPPENBURG
Architectural Registration Board, State of Wisconsin

LEIGH HUNT
Representative, Hospital Advisory Board, State of Wisconsin

ALBERT F. GALLISTEI
Director of Physical Plant Planning, University of Wisconsin

JOSEPH J. WEILER
ALLEN J. STRANG
Lecturers, School of Commerce, University of Wisconsin

Golden Award recipient and Emeritus member John P. Jacoby, FAIA, Menomonee Falls, recently passed along the 1953 membership directory of the Wisconsin Architects Association, A Chapter of The American Institute of Architects. The staff of *Wisconsin Architect* magazine felt it was appropriate to reproduce this directory in the 1995 edition of the AIA Wisconsin *Construction Industry Handbook*.

AIA Documents
Full Service Distributor

The following is a list of the AIA Documents available from AIA Wisconsin, the state's only authorized full-service distributor of AIA Documents. The first price listed indicates the nonmember price per document and the second the AIA Wisconsin member price.

For more information or to order, please call Mary at (608) 257-8477 or 1-800-ARCHITECT.

A Series/Owner-Contractor Documents

A101	Standard Form of Agreement Between Owner and Contractor — Stipulated Sum (1987)	2.00	1.50
A101/CMa	Standard Form of Agreement Between Owner and Contractor — Stipulated Sum — Construction Manager-Adviser Edition (1992)	2.00	1.50
A105/A205	Standard Form of Agreement Between Owner and Contractor for a Small Project and General Conditions of the Contract for Construction of a Small Project (1993) 2 document set	4.00	2.80
A107	Abbreviated Owner-Contractor Agreement Form for Construction Projects of Limited Scope — Stipulated Sum (1987)	2.00	1.50
A111	Standard Form of Agreement Between Owner and Contractor — Cost Plus Fee (1987)	2.00	1.50
A117	Abbreviated Owner-Contractor Agreement Form — Cost Plus Fee (1987)	2.00	1.50
A121/CMc	Standard Form of Agreement Between Owner and Construction Manager Where the Construction Manager is also the Constructor (1991)	3.00	2.10
A131/CMc	Standard Form of Agreement Between Owner and Construction Manager Where the Construction Manager is Also the Constructor and Where the Basis of Payment is Cost of Work Plus a Fee and There is No Guarantee of Cost (1994)	3.00	2.10
A171	Standard Form of Agreement Between Owner and Contractor for Furniture, Furnishings and Equipment (1990)	2.00	1.50
A177	Abbreviated Owner-Contractor Agreement for Furniture, Furnishings and Equipment (1990)	2.00	1.50
A191	Standard Form of Agreements Between Owner and Design/Builder (1985)	3.00	2.10
A201	General Conditions of the Contract for Construction (1987)	4.00	2.80
A201/CMa	General Conditions of the Contract for Construction—Construction Manager-Adviser Edition (1992)	4.00	2.80
A201/SC	Federal Supplementary Conditions of the Contract for Construction (1990)	2.00	1.50
A271	General Conditions of the Contract for Furniture, Furnishings and Equipment (1990)	4.00	2.80
A305	Contractor's Qualification Statement (1986)	2.00	1.50
A310	Bid Bond (1970)	1.00	.70
A311WI	WI Private Improvement/Performance Bond (1981)	1.30	.90
A312	Performance Bond and Payment Bond (1984)	2.00	1.50
A312WI	Performance Bond & Payment Bond (WI Public)	1.30	.90
A401	Standard Form of Agreement Between Contractor and Subcontractor (1987)	3.00	2.10
A491	Standard Form of Agreements Between Design/Builder and Contractor (1985)	3.00	2.10
A501	Recommended Guide for Bidding Procedures and Contract Awards (1982)	3.00	2.10
A511	Guide for Supplementary Conditions (for use with A201) (1987)	5.00	3.50
A511/CMa	Guide for Supplementary Conditions—Construction Manager-Adviser Edition (For use with A201/CMa) (1993)	5.00	3.50
A512	Additions to Guides for Supplementary Conditions (1989)	1.00	.70
A521	Uniform Location Subject Matter (1981)	3.00	2.10
A571	Guide for Interiors Supplementary Conditions (for use with A271) (1991)	5.00	3.50
A701	Instruction to Bidders (1987)	2.00	1.50
A771	Instruction to Interiors Bidders (1990)	2.00	1.50

B Series/Owner-Architect Documents

B141	Standard Form of Agreement Between Owner and Architect (1987)	2.00	1.50
B141/CMa	Standard Form of Agreement Between Owner and Architect—Construction Manager-Adviser Edition (1992)	2.00	1.50
B144/ Arch-CM	Standard Form of Amendment to the Agreement Between Owner and Architect Where the Architect Provides Construction Management Services as an Adviser to the Owner (1993)	2.00	1.50
B151	Abbreviated Owner-Architect Agreement Form for Construction Projects of Limited Scope (1987)	2.00	1.50
B155	Standard Form of Agreement Between Owner and Architect for a Small Project (1993)	2.00	1.50
B163	Standard Form of Agreement Between Owner and Architect for Designated Services (1993)	5.00	3.50
B171	Standard Form of Agreement for Interior Design Services (1990)	2.00	1.50
B177	Abbreviated Interior Design Services Agreement (1990)	2.00	1.50
B181	Standard Form of Agreement Between Owner and Architect for Housing Services (1994)	2.00	1.50
B352	Duties, Responsibilities, and Limitations of Authority of the Architect's Project Representative (1993)	1.00	.70
B431	Architect's Qualification Statement (1993)	2.00	1.50

B511	Guide for Amendments to B141 (1993)	5.00	3.50
B727	Standard Form of Agreement Between Owner and Architect for Special Services (1988)	2.00	1.50
B801/CMa	Standard Form of Agreement Between Owner and Construction Manager Where the Construction Manager is Not a Constructor (1992)	2.00	1.50
B901	Standard Form of Agreements Between Design/Builder and Architect (1985)	3.00	2.10

C Series/Architect-Consultant Documents

C141	Standard Form of Agreement Between Architect and Consultant (1987)	2.00	1.50
C142	Abbreviated Form of Agreement Between Architect and Consultant (1987)	2.00	1.50
C727	Standard Form of Agreement Between Architect and Consultant for Special Services (1992)	2.00	1.50
C801	Joint Venture Agreement (1993)	2.00	1.50

D Series/Architect-Industry Documents

D101	Architectural Area and Volume of Buildings (1980)	1.00	.70
D200	Project Checklist (1982)	5.00	3.50

F Series/Compensation Guidelines Forms and Worksheet

F800	F810 through F860 Complete Set 2 each of 24 Forms (1978)	7.00	5.00

F Series/Standard Accounting Forms and Worksheets for Architects

F1001 thru F3002	These documents are included in the book, *Standardized Accounting For Architects* by Robert F. Mattox, FAIA (1982) (Order #M705)	20.00	14.00
F5002	Invoice for Architectural Services (1978) (50 sheets per unit)	7.00	5.00

G Series/Architect's Office and Project Forms

Sold Individually

G601	Request for Proposal — Land Survey Agreement (1994)	2.50	1.75
G602	Request for Proposal—Geotechnical Services (1993)	2.00	1.50
G612	Owner's Instructions Regarding the Construction Contract, Insurance and Bonds, and Bidding Procedures (1987)	3.00	2.10

50 Sheets per unit:

G604	Professional Services Supplement (1993)	8.00	5.60
G701	Change Order (1987)	8.00	5.60
G701/CMa	Change Order— Construction Manager-Adviser Edition (1992)	8.00	5.60
G702	Application and Certificate for Payment (1992)	8.00	5.60
G702/CR	Application and Certificate for Payment Continuous Roll (1992)	8.00	5.60
G702/CMa	Application and Certificate for Payment— Construction Manager-Adviser Edition (1992)	8.00	5.60
G703	Continuation Sheet for G702 (1992)	8.00	5.60
G703/CR	Continuation Sheet for G702 Continuous Roll (1992)	8.00	5.60
G704	Certificate of Substantial Completion (1992)	8.00	5.60
G704/CMa	Certificate of Substantial Completion— Construction Manger-Adviser Edition (1992)	8.00	5.60
G706	Contractor's Affidavit of Payment of Debts and Claims (1994)	8.00	5.60
G706A	Contractor's Affidavit of Release of Liens (1994)	8.00	5.60
G707	Consent of Surety to Final Payment (1994)	8.00	5.60

by David Jordani, AIA

Obtaining CAD in Today's Market

CAD systems are commodity items today. We can buy hardware at discount houses and warehouse sales, and we can purchase CAD software off the rack at airport newsstands. Useful systems are priced within the reach of every firm. And using CAD to produce simple drawings is well within the capabilities of even the one-person practice.

Success isn't guaranteed, or at least so it seems, as soon as you install the system. For those who don't demand too much of their CAD investment, the process is simple and uncomplicated. A recent survey even claims that 80 percent of CAD users now say their efforts are profitable. To the casual observer it appears that CAD has finally become as simple as the vendors promised it would.

But we continue to hear from a number of firms that share a very different perspective. Maybe it's the definition of success. Some firms are content with modest gains in drafting productivity. Others, sensing a more fundamental change in the way in which this technology will be used, are striving for more strategic benefits from CAD.

The more aggressive firms are positioning for the future in a construction industry where the progressive and creative use of computers will be essential to business success, perhaps even an issue of survival. For these firms the search for the holy grail of architectural CAD is a continual effort. There's no room for cavalier attitudes regarding CAD implementation. Sound business and management principles must be applied.

Regardless of your goals for using CAD, two factors lead a host of other issues that firms must consider as they expand or even start their CAD implementations.

First, CAD systems continue to get more sophisticated in the face of unparalleled technological growth. After a brief respite during the introduction of PCs, today's networked CAD can be every bit as difficult to manage as the mainframe systems of the early 80s. And gone is the support net that was provided by the turnkey vendor. Distribution strategies have changed dramatically. The increased technical complexity of these systems coupled with changes in distribution strategy mean that architects cannot rely on CAD vendors as their only source for information and support.

Recent problems faced by a Midwest architecture firm illustrate the need for self reliance. This firm had chosen to implement one of the more expensive CAD systems from a major player in the industry. The firm alleges misrepresentation of both

features and costs. Numerous requests for what they felt should have been bug fixes drew no satisfactory response. The feature shortcomings were only partly resolved in a subsequent release that cost more and required additional hardware upgrades that were never anticipated. The firm ultimately chose to switch vendors, and they are happy they did. They have not resolved their problems with their original vendor. The equipment sits unused and resolution may ultimately be left up to the courts.

Was the vendor guilty of misrepresentation? Was the firm too cavalier in its approach, falling victim to seductive marketing at the expense of sound business and management principles? It makes a lot of sense to learn what we can do to avoid similar difficulties.

Caveat emptor is the message for buyers in today's commodity market. Too many CAD salespeople don't know enough about the products they represent to accurately answer your questions. It's not the vendor's job to insure your success, that's your job.

Each firm must prioritize the objectives for the use of CAD. While most CAD systems provide features (or integrate with other packages) for both design and drafting, some systems that offer wonderful rendering capabilities still fall short on their production skills. Don't let yourself be seduced into buying a system for a feature that you will use only 5 percent of the time.

Get familiar with the dynamics of CAD distribution strategies today. Profit margins in this business are very slim. Typically, the best price is going to come from those who don't offer much support. If you don't get good support from your local dealer, you will have to pay for it elsewhere.

Check the reputation of the dealer from whom you are buying. As the fundamental differences among systems become harder to discern, your selection criteria must broaden to include your ability to get cost-efficient support for the software you are choosing. And since there's reasonable chance that the person you will deal with initially may not be around the next time you call, make sure that there will be others in your area who can offer the support that you need.

Check performance from other architects. Don't expect the dealer to tell you things that they probably don't even know themselves. It's one thing to know about a system's feature, but that's a far cry from applying those features to architectural design and production.

Make sure that you understand the contract. If you have been guaranteed pricing for future additional purchases, get it in writing. Clarify the scope and source of training and support that is included as part of your purchase (a printed circuit board designer will be of little help in your office). Differentiate between services provided as part of the contract and additional services and how much you will pay for them. But remember that your dealer is often just a reseller and may not be able to make any price or upgrade commitments to the software that you buy.

Don't assume the job is done once the system is installed. Budget for training and start-up time. Education should be comprehensive and continuing. Someone in the firm should be assigned overall responsibility for ensuring that the goals for the system are achieved. Training and a management strategy have proven to be the most critical components of success.

And, finally, knowledge is the only true defense. As firms more fully integrate CAD, their dependency leaves them exposed to a variety of technical and business risks.

EDITOR: The author is president of the Jordani Consultant Group, Minneapolis, Minnesota, and is a member of the AIA Computer-Aided Practice Professional Interest Area and the executive director of the CADD Management Institute. This article first appeared in the AIA MEMO.

Public Policy Agenda

Founded in 1857, The American Institute of Architects represents 56,000 of the nation's architects. The policy concerns of the AIA extend not only to the laws and regulations governing design, construction, procurement of architectural services and the practice of architecture, but also to a wide range of issues that affect our nation's way of life, the economic climate, the natural environment and the health and safety of citizens. AIA policies reflect the goal of enhancing the quality of life by improving the condition of the built and natural environments.

The following provides a summary of the AIA's position on a number of issues that are of importance to the profession. For further information about AIA positions on these and other issues, please contact the AIA at (202) 626-7381.

Urban Agenda

The AIA believes that a successful urban agenda must include targeted assistance to defined neighborhoods, local-based planning, and coordinated strategies linking social services with public facilities, good design and affordable housing.

Surface Transportation

The AIA supports the visionary provisions in the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) and continues to work with state and local officials to ensure full implementation and funding of the law.

Historic Preservation

The AIA supportS adequate funding for the preservation programs administered by the Department of the Interior, particularly for the new National Center for Preservation Technology and Training.

National Endowment for the Arts

The AIA believes that the NEA performs an indispensable service through its encouragement of cultural activities for the public and supports adequate funding of its cultural enrichment programs, particularly the Design Program.

Affordable Housing

The AIA recognizes the importance of good housing as a necessity of life, a sanctuary for the human spirit, and a valuable national economic resource. The AIA, therefore, supports a national commitment to the goals of a decent home and a suitable living environment for every American family. The AIA seeks cooperation among all levels of government, the private sector, and individual citizens in developing and implementing a national housing policy.

Government Procurement: Selection of Architects

The AIA believes that selecting architects and engineers for federal, state and local government work on the basis of professional qualifications and competence is in the best interest of the public. The AIA supports legislation such as Public Law 92-582 which requires public announcement of all federal contract requirements, selection and ranking

of the three most qualified firms, and contract negotiations with the highest-ranked of the three firms. Further, the AIA will work to incorporate qualifications-based selection procedures into procurement regulations that guide the administration of federal assistance programs and the design contracts that are awarded through these programs.

Health-Care Reform

The AIA believes health-care reform should include: 100 percent deductibility of health insurance costs for the self-employed; portability of benefits for individuals who change or lose their jobs; discontinuation of insurance companies' ability to deny coverage for pre-existing conditions; and measures that would make health benefits more affordable for small businesses.

Environment/Energy

The AIA believes that sustainable development must form the foundation of any planning and design process and encourages government at all levels to be responsible for managing and protecting environmentally sensitive areas. The AIA supports a balanced national energy policy that reduces waste of non-renewable energy resources while encouraging environmentally sound production of energy sources. Further, the AIA encourages continued public and private research and development in all areas of energy-conscious design and technology, with emphasis on the performance of the total building.

Disaster Mitigation/ Hazard Insurance

The AIA supports federal legislation to establish a national disaster mitigation program linked to federal backing of catastrophic insurance losses. Mitigation would be carried out through state plans and the adoption of up-to-date building codes addressing various natural hazards including earthquakes and hurricanes.

Foreign Trade

The AIA supports efforts to remove barriers to international practice and to create opportunities for architects to provide services in other countries. Because of this commitment, the AIA has supported the North American Free Trade Agreement and the services sector of the General Agreement on Tariffs and Trade for their impact on the international practice of architecture.

Job-Site Safety

The AIA believes that the responsibility for job-site safety belongs to the general contractor and continues to work to ensure that the general contractor's traditional role is not extended to the architect by legislation or regulation.

Licensing

The AIA believes that it is in the best public interest for architects to design all structures intended for human habitation or use and that extensive exemptions made to architectural licensing laws serve only to erode the public protection provided by professional licensure.

Professional Liability

The AIA supports legislative and regulatory reforms that curtail the cost and risk of professional liability for architects without jeopardizing the interest of the public. The AIA also supports Good Samaritan legislation to protect architects from being held liable for volunteer services provided in disaster situations.

Government Procurement: Project Delivery

The AIA believes that a variety of project delivery approaches can be used appropriately and effectively by public owners. A project delivery approach should be chosen in response to the parameters of each particular project in order to ensure that the public interest is maintained and that the selected delivery method results in quality and cost-effective design and construction. Regarding design/build, public agencies must recognize and incorporate into the process the public desire for the architect to design building facilities that are safe, functional, cost-effective and attractive. If price is used as a criteria in the design/build selection process, other minimum criteria should be followed to protect the public interest.

Design Excellence

The AIA believes that the federal government has a responsibility to be concerned with the image, functional effectiveness, and lasting architectural value of the buildings it constructs. The AIA, therefore, supports federal laws and regulations encouraging distinguished architectural design that serves the public well and expresses the dignity of our government. The quality of design should always be a key criterion in the procurement of architectural services and the management of construction programs.

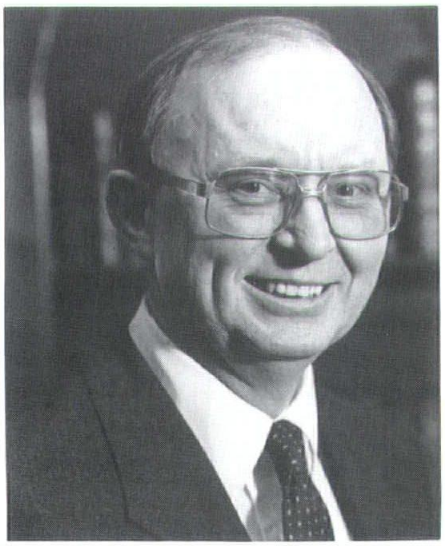
Golden Award

Noble E. Rose, AIA, Janesville, has been selected as the recipient of the 1995 Golden Award by AIA Wisconsin.

The Golden Award is the highest honor AIA Wisconsin can bestow on one of its members. Its purpose is to recognize individual architects who have performed most distinguished leadership and service on behalf of the statewide professional society over an extended period of time and who have advanced the cause of the profession of architecture by providing inspiration to their fellow practitioners.

Rose's award was approved unanimously by the Board of Directors at its December meeting in Milwaukee. "Noble's significant contributions on behalf of the profession and all AIA members in the state exemplify the purpose for which the Golden Award was established," according to Lisa L. Kennedy, AIA, 1994 President of AIA Wisconsin.

The Golden Award will be formally presented to Rose on May 23 at a special luncheon at the 1995 AIA Wisconsin Convention & Building Products Exposition in Madison. Terrence McDermott, executive vice president/CEO of The American Institute of Architects, will be the featured luncheon speaker.



Noble E. Rose, AIA

Noble Rose is the ninth recipient of the AIA Wisconsin Golden Award. Previous recipients recognized for their contributions to the profession include: David E. Lawson, FAIA; Paul H. Graven, FAIA; Mark A. Pfaller, FAIA; Wayne E. Spangler, FAIA; Leonard H. Reinke, FAIA; Nathaniel W. Sample, FAIA; Harry A. Schroeder, AIA; and John P. Jacoby, FAIA.

1995 Convention

Plan now to assemble on May 23 &24 at the Holiday Inn Madison West for the 64th annual AIA Wisconsin Convention & Building Products Exposition. With the theme *ARCHITECTURE—Some Assembly Required*, the 1995 Convention will focus on the challenges and opportunities facing the profession of architecture and individual architects today and in the 21st century.

"Architecture involves the assembly of needs, wishes, hopes, systems, materials, consultants and design," according to Carl Scott, AIA, Appleton, chair of the 1995 AIA Wisconsin Convention. "The architect is responsible for assembling these and many other individual components into a meaningful form, whether they are a sole practitioner or an architect with a larger firm."

This year's AIA Wisconsin Convention has been designed to address practice, design and client-relation issues that will assist architects reclaim their leadership role. The Convention Committee has been meeting night and day to assemble an outstanding two-day program of inspirational keynote speakers, informative professional development seminars, educational product and service displays and many other special events.

AIA members participating in Convention programs also will earn valuable "learning units" (LUs) as part of the AIA's Continuing Education System (AIA/CES). Continuing education will be required for AIA membership beginning in 1998.

Featured Convention keynote speakers include Fred Stitt, publisher of *Guidelines* and author of numerous articles and books on important practice topics, and architect Chuck Thomsen, FAIA, with 3D International and author of *Managing Brainpower*. In addition, Terrence McDermott, executive vice president of the AIA, will be the featured speaker for the Golden Award luncheon.

Concurrent professional development seminars have been assembled into three "tracks" . . . practice, design and clients. Workshop topics include small firm practice, client expectations, accessible design, legal issues, sustainable architecture, partnering and more.

The annual *Construction Industry Reception* is always one of the most educational and popular components of the AIA Wisconsin Convention. Be sure to schedule enough time to assemble with friends for a tour of all of the exhibits in the Trade Center at the Holiday Inn Madison West. It will feature displays of the latest products and services available to Wisconsin's design and construction industry. Exhibit periods are scheduled for both days of the 1995 Convention.

Mark your calendar and watch your mail for further details on the 1995 AIA Wisconsin Convention on May 23 & 24 at the Holiday Inn Madison West. For additional information on *ARCHITECTURE—Some Assembly Required*, please call (608) 257-8477 or 1-800-ARCHITECT.

Distinguished Service

At its December meeting, the AIA Wisconsin Board of Directors awarded a *Citation for Distinguished Service* to the profession of architecture to two AIA members.

Arlan K. Kay, AIA, Oregon, was recognized by the Board of Directors for his significant contributions to the profession during his years of dedicated service and leadership as a member and chairperson of the Architects Section of Wisconsin's Joint Examining Board. During his tenure, Kay was instrumental in the efforts to strengthen and improve Wisconsin's licensing rules and regulations, including present Intern Development Program (IDP) requirements.

Charlie J. Quagliana, AIA, Madison, was awarded a *Citation* in recognition of his significant contributions as chairperson of both the AIA Wisconsin Historic Resources Committee and the 1994 AIA Wisconsin Convention and in appreciation of his efforts to educate the profession and the public on the importance of preserving our architectural heritage.

New Directors

Jack Fleig, AIA, West Salem, has been appointed to fill a Director-At-Large vacancy on the 1995 AIA Wisconsin Board of Directors. He will complete the term of Ernest R. Seymour, AIA, Eau Claire. Fleig is a principal and a member of the Board of Directors of HSR Associates, Inc., in La Crosse.

Other appointments for 1995 approved by the Board of Directors at its December meeting include: Gregory T. Sloniger, Assoc. AIA, Madison, Associate Representative; Jeff Polachowski, Cudahy, UWM Student Representative; and Janelle Glaser, Ridgeland, At-Large Student Representative. Sloniger is an intern with Strang, Inc., Madison, and co-chair of the Southwest Chapter's Associates Group. Polachowski is completing work for an architecture degree at UW-Milwaukee and working at Plunkett Raysich Architects, Milwaukee. Glaser is enrolled in the architectural commercial design program at Wisconsin Indianhead Technical College and works at Spangler Architects, Rice Lake.

WAF Director

Thomas Dowling, Madison, is the newest member of the Board of Directors of the Wisconsin Architects Foundation. He was appointed to fill the vacancy caused by the retirement of Paul Berta. Dowling is vice president of Klipstein Insurance Services, Inc., and a Professional Affiliate member of AIA Wisconsin.

Recommended Practices

After three years of hard work and a great deal of cooperation, the AIA/AGC Liaison Committee published its *1994 Recommended Practices* manual in December. The recommended practices contained in the manual were prepared by architects and contractors representing AIA Wisconsin and the Wisconsin Chapter AGC, with input from various legal and insurance advisors.

The new manual includes recommendations on an array of issues and topics, including standardized bid time and days, payment to obtain bidding documents, multitude of alternate bids, listing of subcontractors on bid form, insurance and bonds, sales and use tax, failure of payment, code compliance, change orders and timely issuance of addenda to bidding documents.

A copy of the 1994 manual has been mailed to AIA member-owned architectural firms in Wisconsin. Your firm may have already added it to its reference library. A very limited number of additional manuals are available by contacting the AIA Wisconsin office or the Wisconsin Chapter AGC at (608) 221-3821.

The AIA/AGC Liaison Committee plans to expand and update the *Recommended Practices* manual on an annual basis. If you have any issues or topics that should be addressed in future editions, please contact one of the AIA Wisconsin representatives on the Liaison Committee: Clarence Huettenrauch, AIA, (414) 351-6390; William T. Gray, AIA, (608) 274-2741; Brian F. Larson, AIA, (715) 834-3161; Thom J. Miron, AIA, (414) 739-4932; and Anthony P. Pawlowsky, AIA, (608) 831-8315.

Fellowship

With the exception of the AIA Gold Medal, advancement to Fellowship is the highest honor The American Institute of Architects bestows upon one of its members. Elevation to Fellowship not only recognizes the achievements of the architect as an individual, but also elevates before the public and the profession a model architect who has made significant contributions to architecture and society.

Fellowship is granted to architects who have shown distinction in fulfilling the objective of the Institute. These five "objects" or categories for advancement include the following:

• *To promote the aesthetic, scientific and practical efficiency of the profession.* Fellowship in this category is granted to architects who have produced distinguished bodies of work through *design, urban design, preservation* or *practice* of architecture. This may be accomplished through individual or organizational effort. Works submitted may be of any size, for any client, of any scope and reflecting any type of architectural service, including project management and firm operations.

• *To advance the science and art of planning and building by advancing the standards of architectural education, training and practice.* Fellowship in this category is granted to architects who have made notable contributions through their work in *education, research* or *literature.* Work in education may be teaching, research (including inventions), administration or writing, and should have a lasting impact, be widely recognized and provide inspiration to others in the field and the profession.

• *To coordinate the building industry and the profession of architecture.* Fellowship in this category is granted to architects who have actively, efficiently and cooperatively *led the construction industry, the Institute* or *related professional organizations* over a sustained period of time and have gained widespread recognition for the results of their work.

• *To insure the advancement of the living standards of people through their improved environment.* Fellowship in this category is granted to architects who have made notable contributions in *public service* or in *government or industry service* through leadership in the development of civic improvements and needed governmental projects, including such elements as conservation, beautification, land use regulation, transportation or the removal of blighted areas, or who have clearly raised the standards of professional performance in these areas by advancing the administration of professional affairs in their fields.

• *To make the profession of ever-increasing service to society.* Fellowship in this category is granted to architects who have made notable contributions to the public good beyond the scope of normal professional activities. Achievements may be of a kind that transcend the other categories for advancement—to serve society or humanity in a unique and important manner.

Any AIA member in good standing for ten years or more is eligible for advancement. Fellowship candidates can be nominated by the AIA Wisconsin Board of Directors, by five or more Fellows or by ten or more AIA members. For further information, advice or assistance, please contact the co-chairs of the AIA Wisconsin Fellowship Committee: Ron Bowen, FAIA, at (608) 238-7626 or Wayne Spangler, FAIA, at (715) 234-9056.

People & Places

Reimar F. Frank, AIA, Oconomowoc, and **Norman A. Hintz, AIA**, Milwaukee, have been approved for Emeritus membership in The American Institute of Architects. Congratulations!

The following AIA Wisconsin members are on the move: **Scott A. Kramer, AIA**, has been promoted to project manager at Plunkett Raysich Architects, Milwaukee; **George Owen, AIA**, and **George Edwards, AIA**, have joined the design staff of The Wilson Firm—Architects/Engineers, Milwaukee; **Mark A. Piquette, AIA**, has joined Architects Group Limited, Green Bay; **Paul W. Powers, AIA**, will lead the architectural department at Mead & Hunt, Inc., Madison; and **Ted R. Haag, AIA**, reports that Haag Design Associates, Inc., has moved to: 1350 14th Avenue, Suite 307, Grafton, WI 53024, (414) 376-7744.

Pat Conway, Assoc. AIA, reports that the International Masonry Institute presented its first annual Wisconsin Golden Trowel Awards for outstanding achievement in architectural design in masonry at a special awards ceremony in Manitowoc. The following firms and projects were recognized: Best of Show—Potter Lawson Architects, Integrity Mutual Company; Honor Award (Commercial)—Flad & Associates, American Family Insurance National Headquarters; Merit Award (Commercial)—Durrant-Heike Architects, Wisconsin Lutheran Recreation Center; Honor Award (Institutional)—The Stubenrauch Associates, Waukesha West High School; Merit Award (Institutional)—Eppstein Keller Uhen Architects, Lake Bluff Elementary School; and Honor Award (Renovation)—BHS Architects, The Equitable Bank Corporate Headquarters.

Wayne E. Spangler, FAIA, having just completed 35 years of architectural practice in Rice Lake, is actively seeking a young, energetic architect to become a partner in the firm. Responsibilities include marketing and client contact, design, document development and production, and

field observation reporting. Clones welcome, but not mandatory. For information, contact: Spangler Architects, 35 West Eau Claire Street, Rice Lake, WI 54868; phone: (715) 234-9056; fax: (715) 234-9057.

Victor D. Halloran, AIA, Green Bay, (a.k.a. "Mr. Lego") recently helped the children at Tank Elementary become more aware of architecture. Vic brought Legos in four large tubs to the school's family activity night. Parents got on the floor and joined their kids in constructing special creations. What was originally planned for one grade became a program for the entire school.

J. Gerard Capell, AIA, Milwaukee, reports that AIA members can earn AIA/CES learning units (LUs) by participating in Milwaukee Chapter CSI programs, including regular monthly meetings, the Certification Committee's "Study Sessions," and seminars offered at the upcoming CSI Product Show on March 16, 1995, at the Pfister Hotel. The Milwaukee Chapter CSI is now a AIA/CES "registered provider." For additional information, call or fax Gerard at (414) 962-2033.

The Department of Engineering Professional Development, College of Engineering, University of Wisconsin–Madison/Extension, offers a wide range of professional development programs throughout the year. A sample of upcoming programs includes: "Creativity in Design" (February 15–17), "Preventive Maintenance of Buildings and Grounds" (February 27–March 1), "Successful Energy Project Analysis and Selection" (March 6–10), "NCARB Spring Refresher: a practical review for the non-design portion of the Architect Registration Examination" (Thursday evenings, March 23–May 11, at your worksite or at a UW campus near you), "Facilitation Skills for Project Management" (March 29–31), and "Residential Construction Technology '95" (April 6–7). For information on UW–Madison/Extension programs, call 1-800-462-0876.

The Wisconsin Trust for Historic Preservation will be celebrating "Preservation Day 1995" on March 9 at the State Capitol in Madison. For information, call the Wisconsin Trust office at (608) 255-0348.

The Wisconsin Chapter of the Society for Marketing Professional Services (SMPS) is sponsoring a Marketing Technology Seminar and Trade Show on March 23 at the Country Inn in Pewaukee. **Scott Braley, AIA**, with Heery Architects & Engineers, Atlanta, will speak on "Teaching Technical Staff to Market." For details, contact Debora Seater at (414) 783-6130.

The American Public Works Association has approved a policy statement endorsing use of Qualification Based Selection, saying the public interest is best served when governmental agencies use QBS to select architects, engineers and related professional consultants. "Basing selections on qualifications and competence (rather than price) fosters greater creativity and flexibility, and minimizes the potential for disputes and litigation," according to the APWA statement. For information on AIA Wisconsin's QBS program, contact Carol Williamson at (608) 257-8477 or 1-800-ARCHITECT.

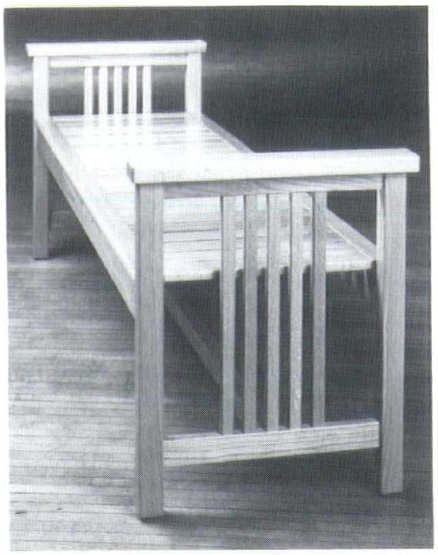
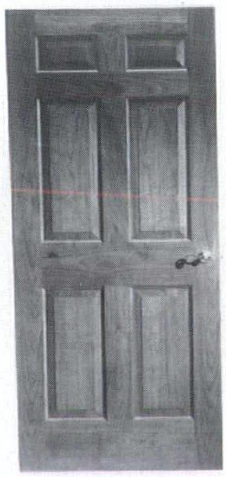
Creating a beautiful addition to exterior settings, Landscape Forms has added five backless benches to its Kenworthy Collection of garden benches and companion chairs. In addition, they may be specified for interior use where a warm, inviting feeling is desired without the use of upholstery.

All backless bench styles are available for interior use in maple or red oak with a clear laquer finish. For exterior use, they are availalbe in jarrah finished with a light sealer.

For more information, contact LFI, 431 Lawndale Ave., Kalamazoo, MI 49001; Phone (800) 521-2546.





Eggers Industries announces the availability of a 45-minute and 60-minute rated true 1 3/4" stile and rail door.

The new doors are avilaable in 4' 0" x 9' 0" single swing, or 8' 0" x 8' 0" pairs with wood beads of up to 1296 sq. in. for the 45-minute rated door, and 100 sq. in. for the 60-minute door.

Eggers also announces the availability of a 90-minute rated wood jamb with a maximum opening of 8' 0" x 8' 0".

For application and specification information contact Greg Shavlik, Eggers Industries, 1819 E. River St. Two Rivers, WI 54251. Phone: (414) 793-1351; Fax: (414) 793-2958.

Star Sprinkler Corp., Milwaukee-based manufacturer of sprinklers and accessories for the fire protection industry, recently introduced a new series of attractively designed Extra Large Orifice (ELO) sprinklers ideal for installation in retail stores and shopping malls.

The Star Galaxy Model SG ELO pendant sprinkler is UL listed to protect up to 400 square feet of a hazard classification up to Ordinary 2, where the storage height does not exceed 12 feet. It features a small, streamlined and unobtrusive frame design that is ideal for architecturally sensitive projects.

Benefits of its expanded coverage are numerous. Fewer sprinklers are required, material and labor costs are reduced and system water pressure requirements are substantially reduced.

For complete information, contact your local Star Sprinkler Distributor or Star Srinkler Corporation, 307 W. Layton Ave., Milwaukee, WI 53207. Phone: (414) 769-5500.

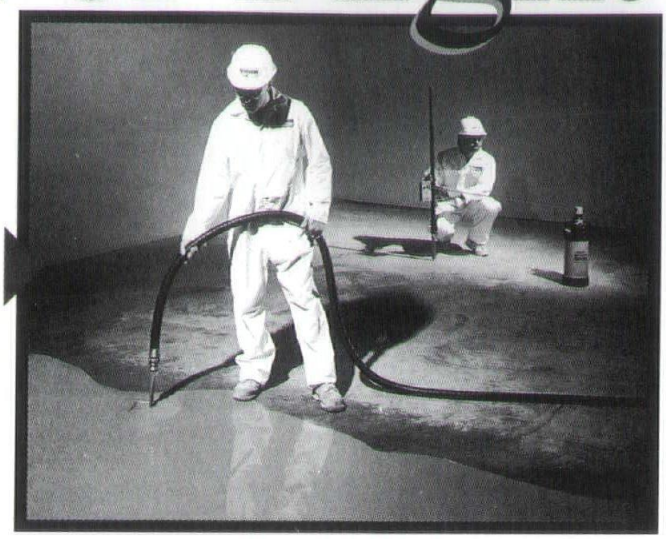
LEVEL FLOORS. LESS MONEY.

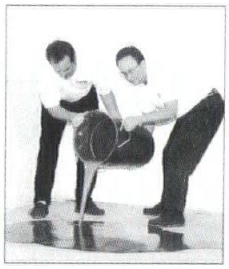
Level-Right®



Self-Leveling Floor Underlayment

Level-Right delivers superior results for any floor-leveling challenge...

- New construction or renovation
- Leveling entire floors or transition areas, featheredge to deepfill
- Resurfacing old or damaged concrete floors
- Topping old ceramic, marble or terrazzo floors
- 5500 PSI; water resistant
- No troweling required
- Enclosing VCT, VAT or asbestos adhesive
- Capping cracked, lightweight concrete
- Filling "duck ponds" in concrete floors
- Provides a temporary wear surface in as little as 2 to 4 hours after application
- Accepts nearly all floor coverings



LEVEL-RIGHT® can be barrel-mixed or pumped in place.

Pour on a perfect floor—with Level-Right. For specifications or a quote, contact:

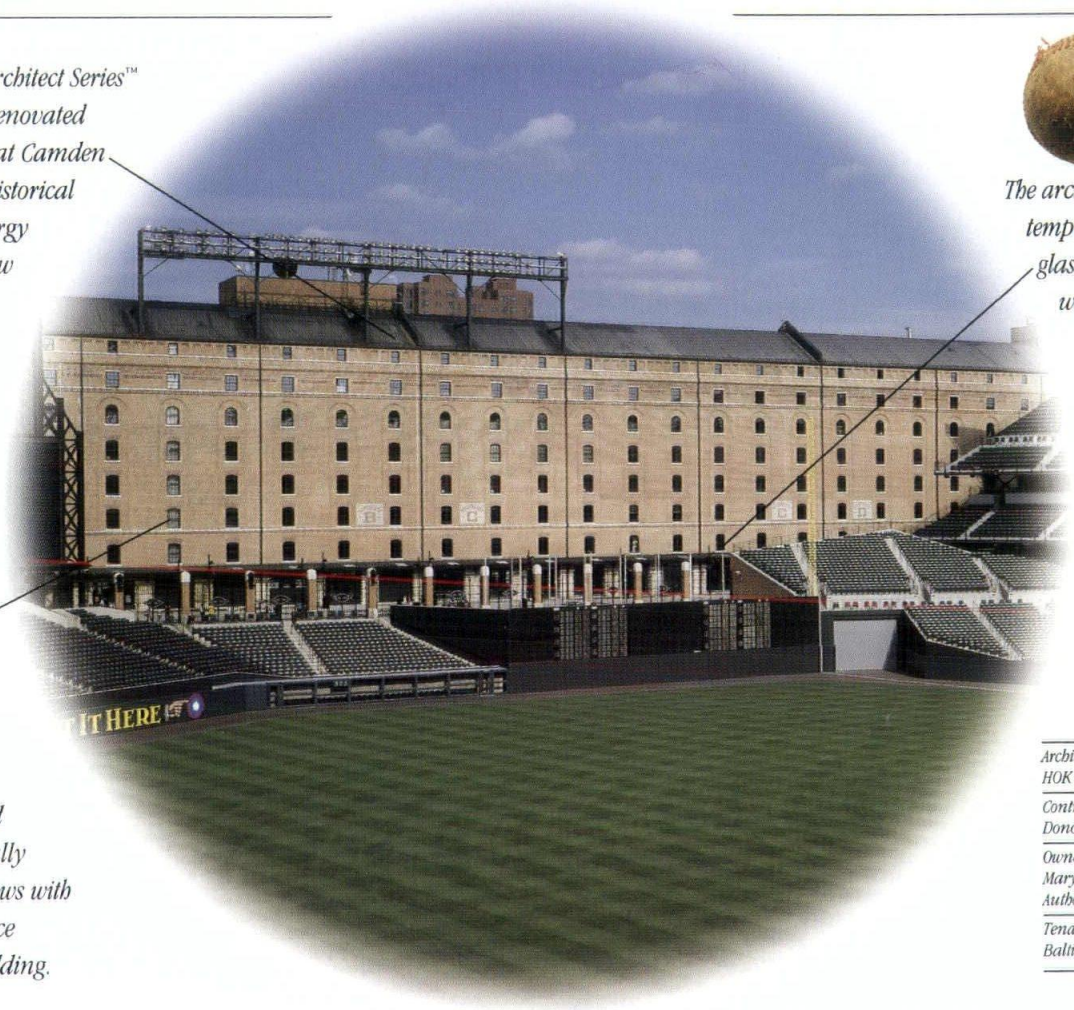
ANOTHER REASON TO USE PELLA® WINDOWS

817 hits. No errors.

The 817 Pella® Architect Series™ windows in the renovated B&O Warehouse at Camden Yards combine historical authenticity, energy efficiency and low maintenance.



The architect specified tempered safety glass for windows within range of Baltimore Oriole bats.

Only Pella could provide historically authentic windows with low-maintenance aluminum cladding.

Architect:
HOK Sports Facilities Group

Contractor:
Donohoe Construction

Owner:
Maryland Stadium Authority

Tenant:
Baltimore Orioles

Pella Corporation is a Sponsor of The National Arbor Day Foundation

"We felt very strongly that the replacement windows should have the appearance of true divided light on both the exterior and interior," explains Janet Marie Smith, Vice President of Planning and Development for the Baltimore Orioles. "We were delighted to find a window from Pella that would give us the authentic look, the energy efficiency and the low maintenance we wanted, at a competitive price." Let the Pella Commercial Division provide innovative solutions (and architectural support services) for your window challenges. Contact your Pella Commercial Specialist.

Quality like this only comes from Pella.
